

Continued Engineering Probation Worksheet

Directions: Please answer the questions below after completing the online probation module and bring this worksheet with you to your advising appointment. Use the back of this sheet if you need additional room.

Probation Information

1. Are you on probation as a result of your grades in major courses and/or grades in required technical courses? Refer to the online module and your probation worksheet as needed.
2. What grades will you need to earn in your classes this semester to remove yourself from probation and avoid dismissal? Be specific, i.e. a B in M 408C.

Individual Assessment and Action Plan

1. What ongoing non-academic and/or academic issues are affecting your ability to remove yourself from probation?
3. What strategies did you use last semester to improve your grades?
4. Did those strategies help improve your academic performance? If yes, describe how. If not, describe why you believe they didn't work.
5. Are there additional or different strategies you feel you need to undertake this semester to insure you improve your grades so you can be removed from engineering probation and avoid dismissal? If so, please list them below. If not, explain why.
6. What else do you want your advisor to know about your situation?
