Support Our Student Programs

Texas Engineering’s five student support programs help our students develop into well-rounded leaders who think creatively, work collaboratively and push technological boundaries.

- **Engineering Scholarship Program**: The Engineering Scholarship Program works with corporate supporters and alumni to connect students with critical scholarships. These scholarships increase the quality and retention of students enrolled in the school and allow companies to make a significant difference in the lives and careers of engineering students. Scholarships can target specific groups based on academic achievements, involvement in extracurricular activities or financial need. - **Equal Opportunity in Engineering Program**: The Equal Opportunity in Engineering Program actively recruits and supports students from historically underrepresented populations in Texas and other students who contribute to diversity on our campus. Because of the program, Texas Engineering ranks among the nation’s top schools for producing minority engineering graduates. Learn more: engr.utexas.edu/eoe | 512-471-5953

- **International Engineering Education**: Through study abroad experiences organized by the International Engineering Education office, engineering students learn what it takes to be global leaders. Such experiences broaden a student’s perspective, knowledge and awareness. Learn more: engr.utexas.edu/undergraduate/iee | 512-232-9675

- **Women in Engineering Program**: The Women in Engineering Program connects pre-college and college students to the creative and innovative field of engineering, showcasing how engineers make an impact on society. Through efforts to recruit, support and graduate female engineers, the number of women engineering students at the Cockrell School continues to grow. Learn more: engr.utexas.edu/wep | 512-471-5650
