

Future Longhorn Engineers:

We invite you to use the following information when you apply for admission to the Cockrell School of Engineering at The University of Texas at Austin.

Academics at the Cockrell School of Engineering

ENGINEERING MAJORS

The Cockrell School grants degrees in nine different majors. Please note that you may select up to two different engineering majors for your first and second choices when applying for admission to UT Austin. We recommend doing a little research ahead of time to choose the ones that best match your interests. To read about our programs online, visit www.engr.utexas.edu

ADMISSIONS

To apply to UT Austin, you will need to complete the ApplyTexas Application for Admission.

- Complete the application online at: www.applytexas.org
- Deadline to apply for Fall 2010 admission: December 15

Visit bealonghorn.utexas.edu/freshmen/requirements for a complete list of additional items required, such as essays.

CALCULUS READINESS

To be considered for admission to the Cockrell School of Engineering, students must meet a Calculus Readiness requirement by the official admissions deadline. This demonstrates that you are ready for college level calculus courses.

You have three options for fulfilling the requirement:

- Submit a score from the SAT II Subject Test in Mathematics of at least a 560 on the Level 1 exam or a 530 on the Level 2 exam.
- Submit an official AP Calculus exam score of 3 or higher from the end of your junior year.
- Submit a transcript that shows a grade of C or higher in a college-level pre-calculus or calculus course.

If you do not submit proof of calculus readiness by the Dec. 15 deadline, you may continue through the admissions process if you submit evidence of one of the following:

- An SAT I Math score of at least 600 or an ACT Math score of at least 26
- Documentation of concurrent enrollment in dual credit pre-calculus or calculus

If you're admitted to engineering without meeting the calculus readiness requirement (the appropriate SAT II score, AP score or a grade in pre-calculus or calculus), you will be required to submit proof of calculus readiness before enrolling in the Cockrell School of Engineering.

www.engr.utexas.edu/prospective/math

ENGINEERING HONORS PROGRAM

The Cockrell School of Engineering has an honors program designed for first-year students. You may apply using the ApplyTexas Application which requires the following:

- One additional essay
- December 15 deadline

Those selected receive the following benefits:

- Enrollment in honors sections of classes
- Research opportunities
- Invitations to honors seminars
- Invitations to honors social events
- Access to honors residence halls
- Membership in the Engineering Honors Council

For more information, contact:

LIVING ON CAMPUS

The online housing application opens August 1.

To access the housing application, you must submit your admissions application and all required supporting documentation, and it must be received by the UT Admissions Office. For more information, visit: bealonghorn.utexas.edu/freshmen/housing

Engineering students benefit from several unique residential programs designed to improve your on-campus living experience. Our on-campus living programs include:

- Residential FIGs: A Residential First-Year Interest Group (FIG) is divided into groups of about 20 first-year students, organized by college or course of study, who live in Whitis Residence Hall. Each FIG cluster shares two courses in common. FIG students also attend a weekly seminar facilitated by academic advisors and peer mentors.
- The Women Engineers in Littlefield (WELD) residential program hosted by the Women in Engineering Program (www.engr.utexas.edu/wep) is open to 30 female engineering students who live in Littlefield Residence Hall. WELD benefits include welcome bags, kick-off and mentor events, and more.
- Honors Housing: If you're admitted to the Engineering Honors Program, you may qualify to live in one of the three

Honors Residence Halls: Andrews, Blanton and Carothers. These house approximately 500 men and women, and provide an instant set of peers committed to high level academic performance. Reserved spaces are limited, so apply for housing as early as possible.

- Academic Community Centers: On-site tutoring, study tables and academic advising are offered to engineering students at Jester and Kinsolving Residence Halls.

ENGINEERING SCHOLARSHIP PROGRAM

The Engineering Scholarship Program awards merit-based scholarships and a limited number of out-of-state tuition waivers to engineering students. Overall, the Cockrell School awards approximately \$2.9 million annually to first-year and continuing students. Scholarship awards have ranged from \$1,000 to \$9,000. To be considered for engineering scholarships, you must:

- Complete the ApplyTexas application for admission and the scholarship section by December 1
- Mark Engineering as your first-choice major

For more information visit the Engineering Scholarship Program: www.engr.utexas.edu/scholarships
scholarships@engr.utexas.edu

VISIT CAMPUS

Prospective engineering student information sessions are typically held on Fridays from 2 to 3:30 p.m. Academic Advisors and student representatives provide general information about the Cockrell School of Engineering and answer questions.

These dates and times are subject to change, so view event details and register online through Be a Longhorn at: bealonghorn.utexas.edu/visit

CAMPUS EVENTS

Consider attending Explore UT, the university's annual open house, held the first Saturday in March, which showcases art, culture and research across campus. For a full schedule see:
